

AMENDMENTS TO THE DRAWINGS

The originally filed U.S. national stage application Serial No. 10/530,804 included in the drawings, inter alia, “PCT SUBSTITUTE SHEET (RULE 26)” 5/17, “PCT SUBSTITUTE SHEET (RULE 26)” 6/17, and “PCT SUBSTITUTE SHEET (RULE 26)” 7/17.

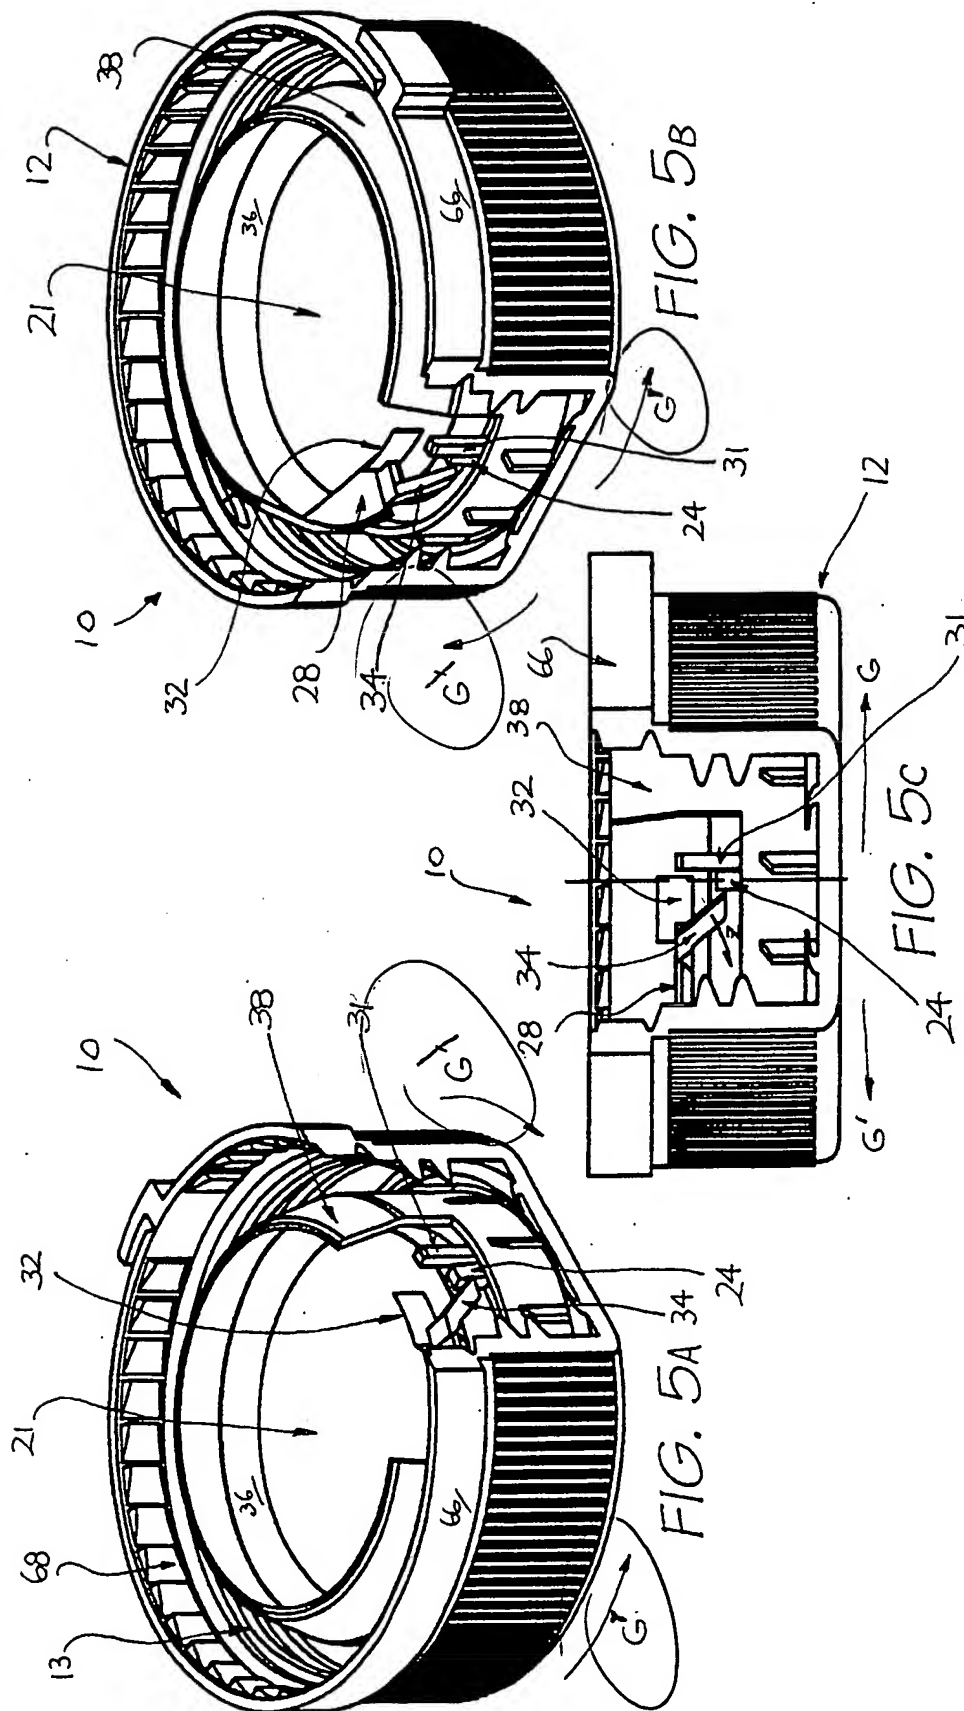

Pursuant to 37 C.F.R. 1.121(d)(1), presented in this amendment section after this page 4 are copies of the above-captioned instant patent application drawing “PCT SUBSTITUTE SHEET (RULE 26)” sheets 5/17, 6/17, and 7/17 which each has been labeled “ANNOTATED SHEET” and marked in red on FIGS. 5A, 5B, 5C, 6A, and 7A to show a proposed correction which interchanges the rotation arrow designations G and G’ for lid rotation.

The proposed correction does not add new matter because the proper operation of the screwing on and off rotation directions represented by the arrows was correctly described in the specification as originally filed and was properly shown in the originally filed drawing FIGS. 10 and 13.

Also, pursuant to 37 C.F.R. 1.121(d), attached at the end of this CORRECTED RESPONSE AND AMENDMENT document are amended copies of the originally filed PCT SUBSTITUTE SHEET (RULE 26) sheets 5/17, 6/17, and 7/17 incorporating the above-discussed drawing correction, and each such sheet is labeled in the top margin as “Replacement Sheet.”

Entry of each Replacement Sheet 5/17, 6/17, and 7/17 is respectfully requested.

5/17

6/17
